

Lending Club Case Study

Problem Statement

A consumer finance company which specializes in lending various types of loans to urban customers receives a loan application, the company has to make a decision for loan approval based on the applicant's profile. If the applicant is not likely to repay the loan, he/she is likely to default, then approving the loan may lead to a financial loss for the company. The aim is to reduce such type of loans.

Objective

To identify these risky loan applicants, then such loans can be reduced thereby cutting down the amount of credit loss. Identification of such applicants using EDA is the aim of this case study. Basically the company wants to understand the **driving factors (or driver variables)** behind loan default.

Approach

Driving Variables

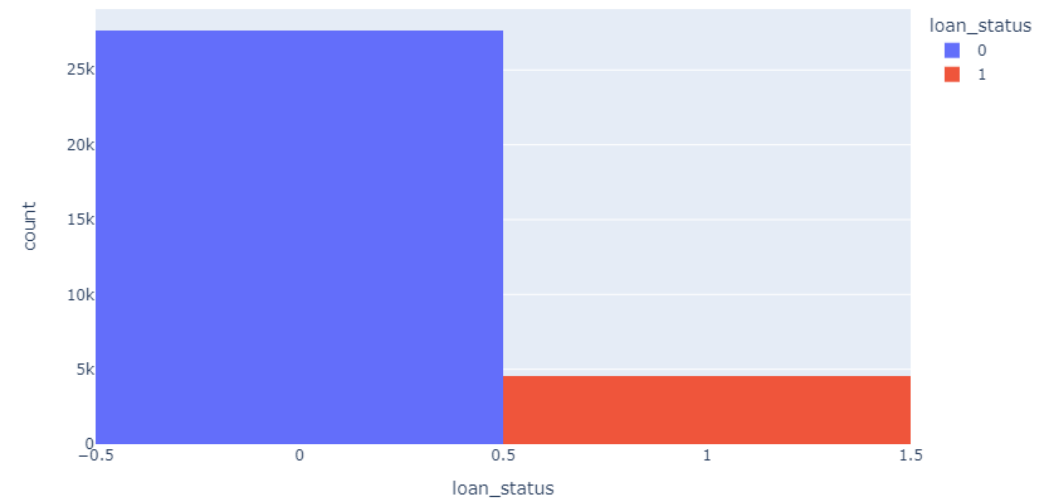

Analysis & Findings – Loan Status

- Around 14% of loan is defaulted

Frequency Of Loan Status

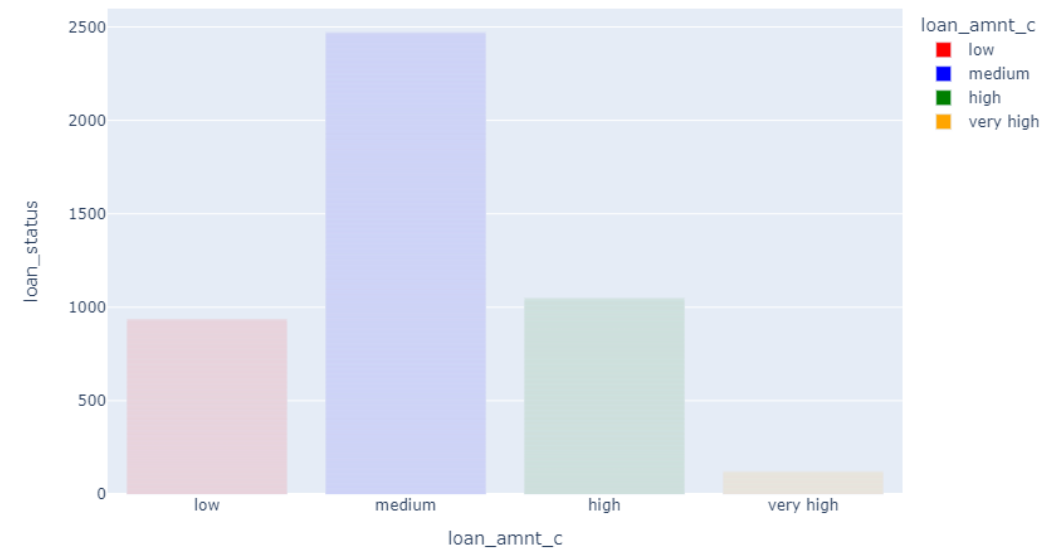

Analysis & Findings – Year

- Default rate increases year by year

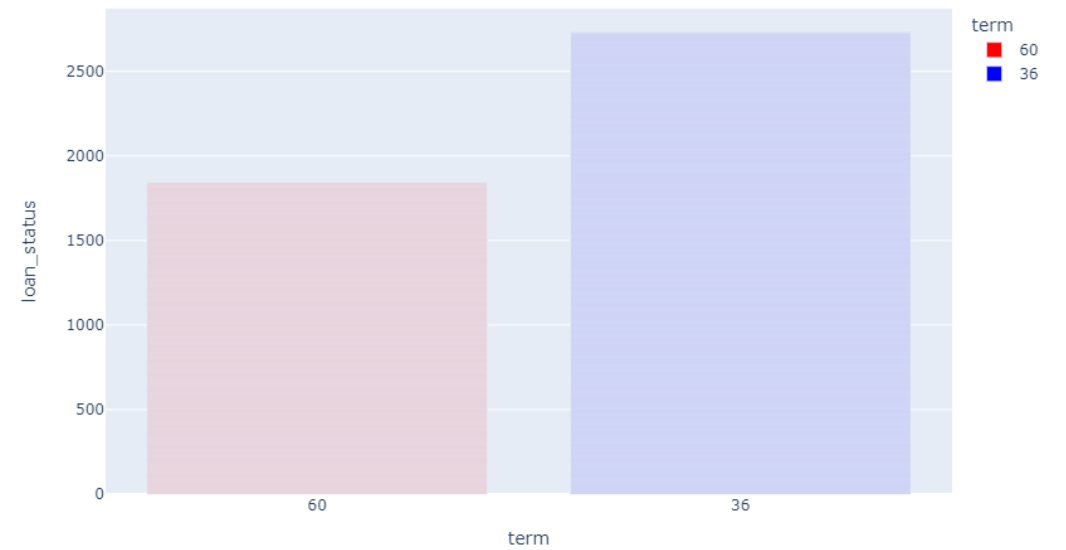

Analysis & Findings – Loan Amount

- Higher the loan amount is more the risk of default. And medium and high ranged loans are more prone to default.

Analysis & Findings - Term

- Higher the term is lesser the default rate.
- 36 months term default rate is higher than 60 months term

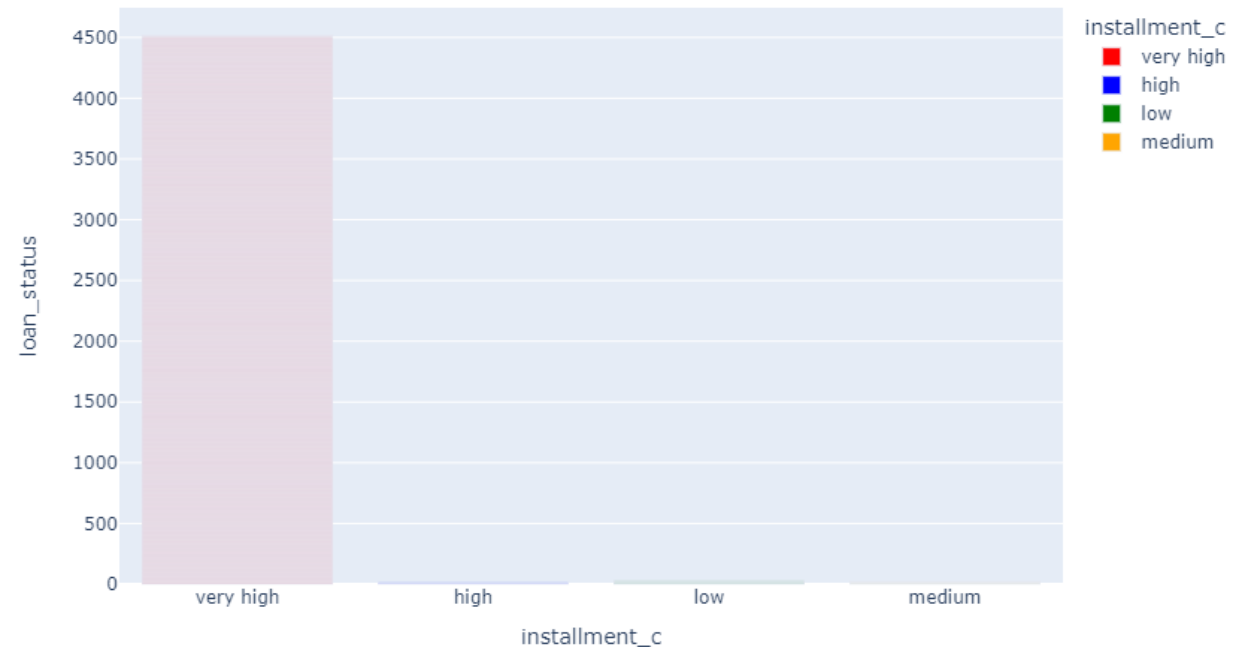

Analysis & Findings – Interest Rate

Default rate increases with interest rate

Analysis & Findings – Installment

Higher the installment amount leads to higher number of defaults

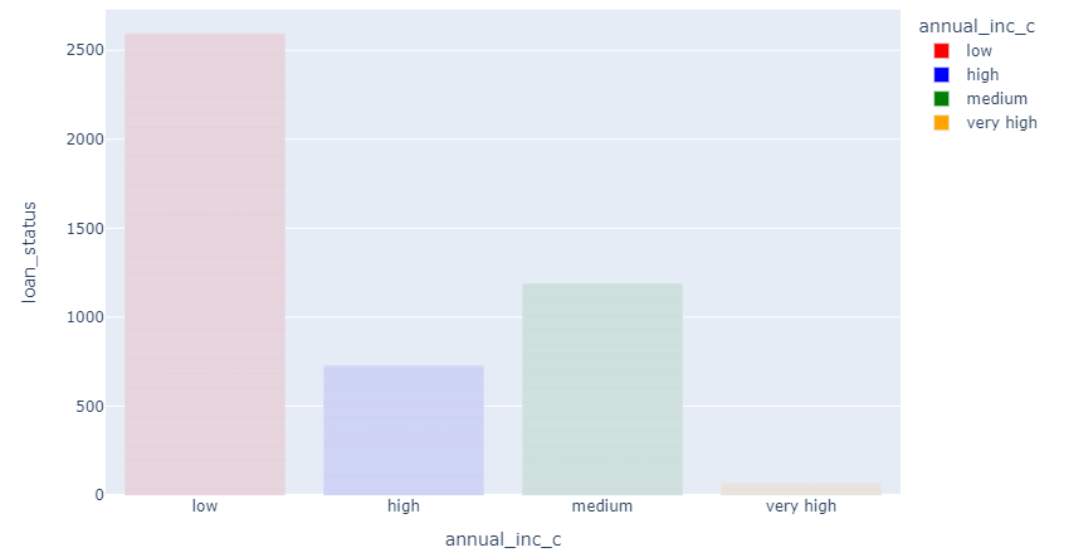

Analysis & Findings – Grade

Low Grade Applicant has high default rate

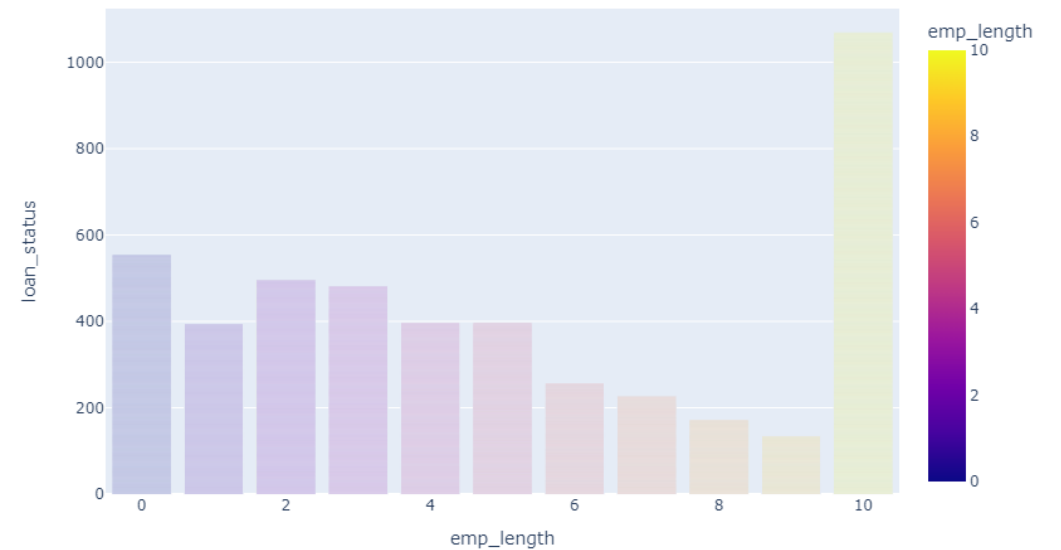

Analysis & Findings – Annual Income

Highly Income Applicant
has less default rate

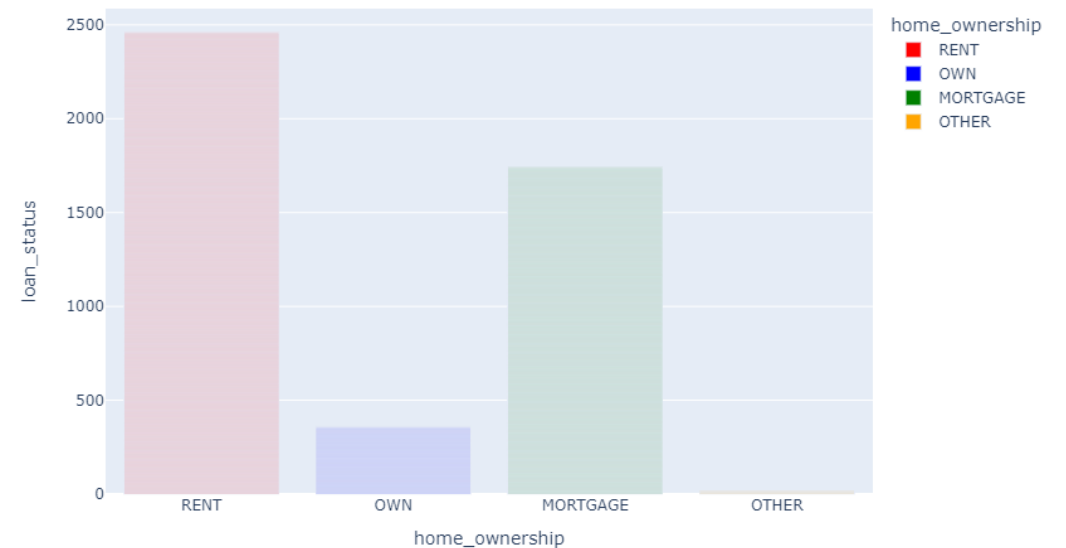

Analysis & Findings – Applicant Experience

Interestingly applicant having more than 10 years or less than 2-3 years have high default rate

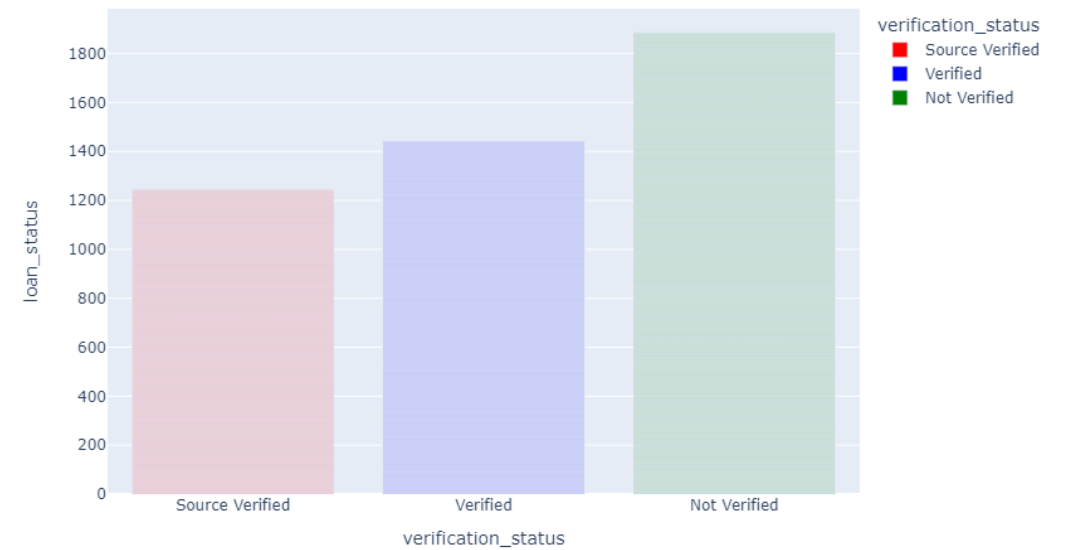

Analysis & Findings – Home Ownership

Rented applicants have high
default rate

Analysis & Findings – Verification Status

Both verified applicants
have higher default rate

Analysis & Findings – Purpose

- Debt consolidation, credit card, small business, home improvement and major purchase purpose loans are top five default loan
- Debt consolidation has the highest default rate

Segmented Analysis & Findings – Purpose

- Debt consolidation - Term, Grade, Interest Rate, Loan Amount impact a lot to default rate for debt consolidation
- Credit card - Grade , Interest Rate, Loan Amount , Debt To Income Ratio impact a lot to default rate for Credit card
- small business – DTI, Interest Rate, Annual Income and Home Ownership impact a lot to default rate for small business

Segmented Analysis & Findings

– Purpose

- home improvement - Home Ownership , annual income, interest rate and term impact a lot to default rate for home improvement . And interestingly mortgage home owners have high default rate
- major purchase – Interest Rate, Term and Grade are key variables for high default rate of major purchase loan

Thank You
